The only reason I'm posting in here is to do my best to translate BGM I can't do for AaAD! Sorry for everyone involved and do any help you could. I've never played or translated this game before and I'm sorry if I made any mistakes. If you could keep in mind I am noob and that is also I can't doing those like that in my free time.

Thank you for considering help. I would really appreciate it. AaAD isn't finished yet so I can't do this for that game. I will do all the more time I can if you continue to help me. Thank you and see you!

Sun, 29 Jun 2016 06:56:50 +0000Catch Me Then: Rowan will you make it so we can play this? There is literally nothing I haven't played through once already. You know RGN- 7 is fucking right? Why have BGM if we can't even listen to them and there is no english patch of AaAD?I have been following this fan translation of AaAD for fucking years and I just wish I wasn't the only one who did so. It's one thing that Fan translation is just a fan, another thing that it is a fully independent translation that is professionally produced. I am waiting for a full translation and I have given up on getting hold of a copy of this! It was easily one of my favourite PSX games... this is one game I desperately want again! I will just keep waiting along with the others. I'm not going to change teams either. In any case, I would like to support any translation out there. We could have an international focus, a 4th world focus or a north American focus. It's up to us in the end

Clinical utility of quantitative coronary angiography for clinical decision making. Quantitative coronary angiography (QCA) is a widely accepted technique for the measurement of absolute coronary luminal dimensions and has become a standard technique in clinical and research settings. The application of QCA to clinical decision making, however, is not straightforward. The purpose of this study was to assess the clinical utility of QCA in different clinical settings. We carried out a pilot study using our patients undergoing coronary angiography. In this study, we measured the reference luminal diameters at two predefined points and at the distal end of each stenosis using an automated edge detection system, and these values were recorded. We then measured the absolute change in luminal diameter at each site as well as the absolute luminal area and diameter stenosis in each patient. We evaluated the correlation between the results obtained using QCA and clinical variables, such as left ventricular function. In all cases, the reference luminal diameter increased proximally, decreased distally, and was larger at the site of the distal edge of the stenosis. The percent of lumen area was also reduced at the site of the distal edge of the stenosis. We found a significant correlation between the percent diameter stenosis and the absolute percent stenosis. The results of this study were obtained from a single center with a small sample size. These findings may be useful in clinical decision-making. If he keeps his knowledge to himself, how can he teach it to another? Why then is he a teacher?" So many people come into my office to get started on their dreams, but once they finish and get to working on their goals, it's like the realization hit them. Wow! I never thought I would be able to do that, or that I would be able to do that. I mean, I've been off and on struggling with dreams and what to do with my life for a long time now, but I never really set concrete goals or took the time to dream about them, or the right things about them. (Then again, I often set concrete goals, but they were not aimed at the right things. Asking where my next pay check was coming from was not really a step toward a personal goal, let alone a significant one.)
