Never before seen in FIFA, "HyperMotion Technology" delivers incredible responsiveness and a higher level of interaction between the player and the ball. In FIFA '22, you'll see the effects of "HyperMotion Technology" in the ball's physics, in-game moments and in the FIFA video-game-like Play Now mode. Further details on FIFA '22 and its stand-out innovations are available in the EA SPORTS blog, at What's New in FIFA '22? Goalkeeper Skills. In FIFA '22, you'll see smarter goalkeepers on both offense and defense, and the importance of positioning. As a goalkeeper, you'll notice that your positioning has a big impact on your ability to stop shots and save the ball. When you're behind your defense, you have the luxury of being able to play for position, but now you can't be as aggressive. This isn't just an "if" situation. It's a "when" situation and the timing is key for a goalkeeper to make a tackle. You'll see more zonal blocking and you'll need to master the art of making and receiving a pass. On the contrary, with the new "interceptions"-based Skill Shots, will you be able to take the goalkeeper out of his attacking zone more and more easily? Make sure you download the FIFA '22 demo and see for yourself. FIFA '22 - Play Now. One of the highlights of FIFA '22 is the new "Play Now" mode. In "Play Now," you'll be able to take the game to the next level. In the new "Champions League" mode, you'll play the game live as if you were a spectator in the stadium, and you'll be surrounded by the official environment and brand look of The Champions League. You'll be able to attend the mass events of the league, like the Champions League or The Cup Final. FIFA '22 - Ultimate Team. "Ultimate Team" is back in FIFA '22. With "Trophies," you'll be able to acquire and use new FIFA
