Rise is a fantasy action RPG that uses an integrated and interactive system that combines town exploration with online play. You can use the setting of Lords of Creation as a setting in which you can develop your own character and take on quests, or a game where you meet other players to experience their story. Players can connect with each other and travel together to new places via their story as they interact with their environments. The setting is a vast land where an endless ocean meets a dense forest teeming with monsters. In addition, there are cities and other places in which you can find people or things that are important to you. Various character statuses and conditions determine each character's story, and your story will take shape as you interact with them and perform quests. A force, which is an avatar of your character, appears when you are in an area that has a good atmosphere. A good atmosphere is one that makes your character feel good, and the good atmosphere is completely up to you. You can customize your avatar by defining the appearance of your character using the costume shop or by using the equipment and magic that you acquire. A unique online element allows you to feel like a member of a group while you create your own unique story. By continuously playing the game, you can use your free time to interact with other players. You can freely develop your character according to your muscle strength to become a strong warrior, or mastering magic. Your choice of weapon, armor, and magic determines the battlefield. System Requirements:

Titanic should be run with a decent graphics card and 4 GB RAM or above. You'll be able to play the game with a resolution of 1920x1080, which is the most common resolution for fullscreen mode. If you don't have 4 GB of RAM, then the game may not work or play correctly. It may also cause crashes and stability issues. That's all that's important. If you're wondering what kind of PC you're running on and what operating system you have, don't. I'm only answering these questions because some people want to know.
