It has been studied as a possible drug for the treatment of cancer and Alzheimer's disease. Suberic acid hydrazide is also an aniline compound. As of 2016, suberic acid hydrazide is being studied in phase 1 clinical trials for Alzheimer's disease. References Category:Alpha-hydroxy acids Category:Amines Category:HydrazidesWe recently identified a number of endogenous inhibitors of the enzyme, cyclic GMP phosphodiesterase. Among these, the immunoreactive protein of 50Kda inhibited the enzyme by 50% (IC50) at approximately 50 microM. This was confirmed in displacement experiments by a number of different PGs and several other ligands. No steroid analogue tested could displace the 50K protein under conditions designed to completely circumvent the hormone dependent inhibition. Yet competitive displacement experiments using both PG and receptor ligands showed striking similarities to the hormone dependent inhibition. We studied the inhibition further and found the 50K protein could be replaced by purified bovine and porcine brain PDE. The protein did not correlate with PDE activity in cell membranes and was completely displaced from membranes by treatment with neuraminidase. The results suggest that the 50
