Elements provides multiple ways to open and save files. You can choose between the five most popular file formats—JPG, TIF, PSD, PDF and TIFF—and can select from over 30 formats that are included with the app. When you save files to the disk, you can choose to save at a maximum file size in the gigabytes or even take advantage of Photoshop Elements' default AUTO SIZE file browser, which only fills the area of the page with an image. When opened, you can work with files only in the sets they are created in—no file sharing. Elements offers iCloud Photo Sharing, so you can share a cropped, resized or rotated image from a cloud service with another user anywhere. The improvements in the recent versions of Elements' built-in editing tools will help you get the most out of the product and work on projects more efficiently. Another key feature is layers, an easy-to-use way of separating parts of an image so that you can experiment with how each component of an image works on its own or how they might work together—either with or without other parts of the image. You can use your own layer patterns or layers created by other users of the community. If you require advanced editing capabilities such as masking or working with masking, Adobe Photoshop is the solution. Although Elements is based on Photoshop, it has fewer features and is easy for a user to master. Unlike Photoshop, Elements works only with JPEG images, so it cannot work with RAW or TIFF files. In addition, Photoshop offers layer masks, 99 preset blending modes, unlimited scroll paths and global adjustment tools. Like Photoshop, Elements allows the user to rotate and rescale an image, match a specific color or create selections. It also has numerous non-photographic editing tools, including Gaussian Blur, Gradient Glow, Glow, Glowing Edges and Layer Mask. The default effects are often intuitive to use, and you can use downloads in the community as well as those from popular online services. If you need to pay a professional to edit your images, Photoshop is your best bet.
