

SAS Statistical Analysis Software Version 913 SP4 Portable !EXCLUSIVE!

SAS 913 Portable SP4 Combination Download. SAS Enterprise Miner Release 5.3.x Portable (EHL) or, the portablesamplifier.com Download Links: /. SAS Enterprise Miner version 5.3 (SP4) for Windows Category:SAS softwareQ: how to get the latest image posted by each user using php So I've read all the similar topics but I haven't found what I need. what I want is to get the latest image posted by each user for an image gallery. I already got a database that holds the users that posted the images, I've got the image path already. I do have the \$id of the user that posted the image (I got all that from the session). how can i do the query to get the latest image that was posted by each user? EDIT This is my current code: "> A: There's a couple of ways you can do this. Use a SELECT query within a SELECT query and LEFT JOIN it with the images SELECT * FROM images LEFT JOIN images_users ON images.id = images_users.image_id WHERE images_users.user_id = \$id This will show the images AND any users who have posted the image Use a GROUP BY and MAX() SELECT * FROM images LEFT JOIN images_users ON images.id = images_users.image_id WHERE images_users.user_id = \$id GROUP BY images.id ORDER BY images.id DESC LIMIT 1 This will show the image AND any users who have posted it but will not display the users for the poster of the image if they don't have at least one post Q: How do I avoid replacing a cell with the same value in every row when I loop through the table? Here's my VBA code. Sub data_entry
